Dženan Košuta

Software Engineer

Software Engineer focused on cross-platform mobile development with React Native, with solid full-stack experience across React, Next.js, Node.js and Python. I build and ship products end to end — from API and AI integrations to release on the App Store and Google Play — across eSIM/IoT connectivity, AI-powered apps (OpenAI) and multi-tenant web platforms.

Technical Skills

AI: OpenAI API / LLM integration, AI-powered product features

Mobile: React Native, Expo, iOS & Android, push notifications, App Store & Google Play deployment

Backend: Node.js, Python, Flask, Django, REST APIs, PostgreSQL

Frontend: React, Next.js, TypeScript, JavaScript, HTML, CSS, Tailwind CSS, Redux / state management

Realtime & Tooling: Socket.IO / WebSockets, Git, Agile workflows (Trello / Jira)

Experience

Agile Software Design GmbH
Software Engineer
Feb 2025 - Present

- Build and ship the React Native app for ZeroMouse, a smart IoT/AI hardware product (iOS & Android) now reaching tens of thousands of users in early access.
- Own the firmware and AI-services integration, and help shape the app's architecture and state management.

Lyntel
Software Engineer
Aug 2023 - Feb 2025

- Delivered the React Native mobile app and React web app for a global eSIM and IoT connectivity platform.
- Owned the automated eSIM activation flow and built in-app chatbot support, simplifying setup for travelers.
- Worked with backend, design and product teams to improve cross-border connectivity.

Novel & Friends
Software Engineer
Sep 2021 - Aug 2023

- Built and shipped mobile (React Native) and web (React, TypeScript) apps for personalized children's stories, live on both stores.
- Integrated the OpenAI API to generate and personalize stories, with a focus on safe, value-driven content.
- Designed the app architecture, state management and API integrations; optimized performance.

Projects

eSkolar — Multi-tenant school information system

- Sole developer of a full-stack, multi-tenant school platform now used by 3 schools, managing staff, contracts, academic structure and exam registrations.
- Multi-tenant architecture with PostgreSQL row-level security, role-based access (8 roles), a real-time student portal with QR-code exam registration, and a four-language interface.

Mektebi — SaaS for school administration

- Sole developer of a multi-tenant SaaS (subdomain per school) used by 5 schools for scheduling, attendance and fee management, with role-based dashboards and email invitations.

Real-time quiz app

- Real-time multiplayer quiz with live scoring; migrated from a React web app to a React Native app published on both stores.

Published mobile apps — Independent React Native apps

- Independently designed and published several React Native apps on Google Play — a location/compass utility, learning apps and a productivity timer.

Education

State University of Novi Pazar — Sep 2019 - Aug 2020
M.Sc. in Mathematics

State University of Novi Pazar — Sep 2015 - Aug 2019
B.Sc. in Mathematics

Languages

English (Fluent)
